

NAME :MUHAMMAD FAIQ SHAH

PROGRAM:BS AI

TITLE:

**Hospital Emergency
Queue System**

PROBLEM STATMENT:

**A small hospital is managing patients in the
Emergency Room (ER). Because patient priority
can
change quickly (new critical patients arrive,
discharged patients leave, etc.), the hospital
wants a
flexible system to keep track of the current
patients in the ER.**

PROPOSED SOLLUTION

insertAtBeginning(patientID)

insertAtEnd(patientID)

insertAtPosition(patientID, position)

deleteFromBeginni
